PRODUCT ENGINEERING

PUBLISHED MONTHLY

McGRAW-HILL PUBLISHING COMPANY, INC. 330 West 42d Street, New York, N. Y.

INDEX TO VOLUME 10

January to December 1939

January 1– 42
February 43– 86
March 87–130
April 131–178
May 179–224
June 225–272
July 273–318
August 319–364
September 365–410
October 411–462
November 463–510
December 511–558

A

Abrasion resistant surfaces 162
Adhesives, industrial. J. L. Perkins 135
Aeronautical design (ed) 87
Air compressor, portable, uses Ford engine as drive and compressor *50
Air conditioning compressor *484
Airplane construction, plastics in *290
Airplane instruments operated by Selsyn motors *10
Airplanes, stored energy in. V. H. Grant. 379
Aluminum alloy joints. E. C. Hartmann .. 77
Aluminum pressings *366
American Society of Tool Engineers hold tool show 213

Appearances and Finishes:

Coloring of metals. Dr. C. B. F. Young, pt. 1, *57; pt. 2, *197; pt. 3, *295; pt. 4 ..... *384
Developments in finishes *540
Insets for molded plastics parts. Warner & MacKenzie *28
New methods in plastics for automobiles *62
Soap dispenser of plastics *187
Superfinish—a new method of machining surfaces. A. M. Swigert *244
Wear and abrasion resistant surfaces. 162
Wrinkle finishes *144

Automobiles:

Backing for a horseless carriage. H. I. Phillips 350
Blower housing for heater *95
Buick direction signal switch *474
Buick's 1940 model changes transmission *470
Buick's shaft knuckle support *473
Cadillac-La Salle rear springs *474
Chevrolet's 1940 transmission changes. *471
Chrysler imperial fluid coupling *96
Engines and transmissions for 1940 autos *465
Hudson rear spring shackle arrangement *473
1940 automobiles *464
Oldsmobile's hydra-matic drive *466
Packard spring leaves *473
Packard torque arm *474
Pontiac chassis for 1940 ..... *472
Streamlined car body doubles gas economy 308
Studebaker's Champion described *226

Awards:

Perkin medal award to Dr. Walter Landis 34

B

Bearings:

Ball bearing bore size shafts. A. C. Rasmussen (table) 381
Ball bearing troubles. Thomas Barlish *88
Heavy-duty bearings. L. M. Tichvinsky *22
"Oilless" or self-lubricating bearings. *158
Sleeve-bearing wall thickness. R. G. N. Evans *30
Beds and frames, machine tool *442
Beryllium alloy developments 517
Bicycle generator parts *282
Bicycle tail-light *378
Blower housing for auto heater *95
Boring, drilling and milling. Cincinnati Gilbert *447
Boring, drilling and milling machines. Sellers *430
Boring machine, hydraulic-feed, electrically controlled *329
Boring machine with dual control *186
Boring mill, Cincinnati Planer *455
Bottle hooder, milk *94
Brasses and bronzes, wrought 156
Brazed joint design *166
Brazed joints, furnace. H. H. Schmitt ... *341
Broaching machine, Oilgear *434

C

Calculating machine *52
Camera lamp *286
Cams, laminated-phenolic. G. J. Talbourdet *369

Castings:

Dental equipment of die-cast aluminum *188
Die-cast and molded-plastic parts compared. Herbert Chase *320
Fastening methods for die-castings .. *496
Iron molds made by electrodeposition . 398
Rubber molds for casting of metals and plastics. G. D. Kratz *388
Steel casting design *153
Steel casting design features, *266; pt. 2 ..... *258
Ceramic parts. H. G. Beebe *111
Chassis of 1940 Pontiac *472
Circuit tester *7

Clutches:

Centrifugal clutches. D. N. Drugis. *242
Friction clutches. Herbert Chase *72

Color:

Coloring of metals. Dr. C. B. Young, pt. 1, *57; pt. 2, *197; pt. 3, *295; pt. 4 ..... *385
Compressor, air, streamlined *189
Compressor, Westinghouse air-conditioning *484
Contacts, electrical. Emmert, Wiggs & Heil, pt. 1, *194; pt. 2 ..... *249

Controls:

Boring machine, electrically controlled *329
Boring machine with dual control *186
Built-in thermostatic controls for small motors. F. A. Appleton *252
Electric heater for metal stock has photoelectric temperature control .. *11
Electronic devices for detecting variations in dimensions and color. G. C. Devol Jr. *191
Grinder has complete electrical control *47
Hydraulic circuits for controlling rate of feed in machines. A. H. Dall ... *336
Multi-speed motors. W. S. Rigby 200
New York World's Fair color symphony *330
Saw, Peerless, has hydraulic automatic control *417
Selsyn motors on airplane instruments *10
Slitter, high-speed, controlled by electric eye *234
Solenoid-operated clutches, limit switches actuate relays on drill machine *283
Stamping, trimming machine with photoelectric control *534
Converter, Hydraulic torque *524
Cork for cibration control 137
Cork-rubber materials. R. M. Hill 239
Coupling, Chrysler imperial fluid *96

D

Damper motor *7
Dental shafts and casings *150
Descaling castings, flame *399

Design, Calculations and Examples:

Air compressor, portable, uses Ford engine as drive and compressor *50
Air compressor, streamlined *189
Automobiles of 1940 ..... *464
Bicycle tail-light *378
Boring, drilling and milling machine, Gilbert *447
Boring, drilling and milling machine, Sellers *430
Boring machine, hydraulic feed *329
Boring machine with dual control *186
Boring mill, Cincinnati Planer *455
Bottle hooder, milk *94
Broaching machine, Oilgear *434
Circuit tester *7
Compressor, Westinghouse air-conditioning *484
Covie diesel weighing 280 lbs *191
Designs should be modern, but not too modern. Hal Falvey 118
Developing tank, screwless *96
Drill, Buffalo Forge, pedestal *431
Drill machine *283
Drilling, boring and tapping machine, Barnes *432
Drilling machine, Barnsdril *422
Electric heater for metal stock *11

(ed) Editorial

Flexible shafts and casings.....*150
Floor sander with nested motor.....*7
Forging hammer *326
Grinder, ball bearing race.....*372
Grinder, Bryant chucking.....*436
Grinder, Gardner precision disk.....*428
Grinding machine, Gardner disk, with louvered guard ring.....*441
Grinding machine, Hill Clutch Machine & Foundry.....*451
Heater for car.....*51
Heater, space *52
Laminated-phenolic cams. G. J. Talbourdet *369
Lathe, Lipe carbo-matic.....*439
Lathe, Monarch Machine Tool.....*457
Lathe pre-selector *328
Lathe with hydraulic speed selector..*284
Machine tool design trends.....*412
Machine tool drives, frames and beds.*442
Miller, Kearney & Trecker vertical ..*483
Milling machine, Sundstrand, has hydraulic feed *414
Milling machine with rotary head, Kearney & Trecker.....*448
1939 survey of design activity....*512-542
Pantograph, Gorton *458
Permanent wave machine made modern *50
Planer, Gray *443
Press, Hannifin Hydraulic.....*440
Printing machine, dry process.....*9
Pumping unit *378
Rayon machine that spins, processes, dries and twists viscose yarn continuously, *98 .....*180
Saw, Peerless, has hydraulic automatic control *417
Scales have torque motors.....*375
Screw machine, Cleveland automatic.*452
Screw machine, Greenlee automatic..*480
Shaper, Rockford, ram and table fed hydraulically actuated *420
Shoe heel finishing machine, Bodin..*426
Spot welded structures. G. G. Cudhea, pt. 1; *344; pt. 2.....*390
Spray gun *378
Steel casting design.....*153
Steel casting design features, *266; pt. 2 .....*258
Studebaker's Champion described....*226
Subway train, streamlined.....*280
Testing machine has load maintaining valves *190
Tractor, Minneapolis Moline.....*232
Tractor with off-set engine.....*376
Turbo-electric Union Pacific locomotive *97
Dental equipment of die-cast aluminum..*188
Developing tank, molded.....*96
Differentials on heavy-duty truck.....*5
Directory of electrical and mechanical parts, materials and finishes. Apr. 85-147
Dope, non-flammable, sought by U. S. Navy 212

Drilling machine:

Drill, Buffalo Forge, pedestal.....*431
Drilling machine *283
Drilling, boring and tapping machine, Barnes *432
Drilling machine, Barnesdril.....*422
Drills, nomograph for selection of tap drills. N. W. Taylor.....*393
Trapped air area causes faulty operation. P. E. Rudbeck.....*304

Drives:

Machine tool drives, frames and beds.*442
Mechanical, electrical and hydraulic installations for automatic tension controls on winders.....*172
Motor drives for vertical shafts. H. D. Seymour *396
Planer drive, Westinghouse variable voltage *446

E

Editorials:

Basis of comparison is experience.... 131
Big jobs to be done..... 411
By all the laws of common sense.... 365
Greatest source for new ideas..... 179
His name was Isaac..... 225
Patent changes inevitable..... 1
Public careers for engineers..... 43
The whole truth is more convincing.. 87
To stimulate the growth of ideas..... 511
Why worry over progress?..... 463
Worth less than nothing..... 319
Electrical conversion system. D. G. Fink.*168
Electroforming. Samuel Wein.....*486
Enamels, crush resistance..... 75
Engineers—public careers for engineers (ed) 43

Engines:

Covic diesel weighing 280 lbs.....*191
Ford engine used on portable air compressor *50
1940 automobile engines and transmissions *465
Equipment developments *542

F

Fastening methods for die-castings.....*496
Felt for vibration control.....*138
Forging hammer *326

Forgings:

Cold forged parts. Herbert Chase.... *2
Effect of forging on tensile strength. R. M. Seabury..... 31
Frames and beds for machine tools.....*442

G

Gears:

Backlash not involved in C value of gears. A. L. Wilde..... 255
Gear calculations. A. C. Rasmussen, pt. 1, 53; pt. 2..... 109
Internal gears. W. F. Larsen.....*301
Generator, flash-type steam.....*286

Glass:

Chemical-resistant *354
Glass fabric insulation. G. L. Moses..*192
non-glare treatment 74

Grinders:

Air turbine *52
Bryant chucking *436
Gardner disk, with louvered guard ring *441
Gardner precision disk.....*428
Has complete electrical control..... *47
Hill Clutch Machine & Foundry.....*451
Horizontal *236
Lundis ball bearing race.....*372

H

Hardening, flame, boring lathe spools....*382

Heaters:

Electric, for metal stock..... *11
For car *51
Modine unit heater.....*517
Space *52
Hinges, door-lug vs. butt. John Best..... 77
Hydraulic circuits. A. H. Dall.....*336

I

Institute of Electrochemistry and metallurgy inaugurated 74
Insulation materials 85
Insulation of glass fabric. G. L. Moses...*192

J

Jack, rollaway *286

Joints:

Aluminum alloy. E. C. Hartmann... 77
Corrosion prevention in liquid tight joints. Ed West 552
Furnace-brazed *166
Liquid-tight riveted joints. F. M. Morris *348

L

Laminated-phenolic cams. G. J. Talbourdet *369
Lantern *11

Lathes:

Lipe carbo-matic *439
Monarch Machine Tool.....*457
Pre-selector *328
With hydraulic speed selector.....*284
Locomotives, steam-electric *74
Locomotive, turbo-electric *97

M

Machine tool design trends.....*412
Machine tool drives, frames and beds....*442
Machine Tool Electrification Forum.....*260
Magnesium silicate ceramics used for parts of machines and instruments. H. G. Beebe.....*111
Magnet coils. G. L. Moses. (Ref. Bk. Sheets) *129; *317
Computing magnetic pull graphically. C. P. Nachod.....*209
Insulating materials. G. L. Moses (Ref. Bk. Sheets)..... 85

Materials:

Air-foamed latex. E. E. Ellies.....*298
Automatic plastic molding.....*132
Copper-tin-lead bearing bronzes. R. G. N. Evans..... 30
Cork-rubber materials. R. M. Hill..*239
Designing metal backed plastic parts. C. H. Whitlock.....*107
Die-cast and molded-plastic parts compared. Herbert Chase.....*320
Directory of electrical and mechanical parts, materials and finishes. Apr. 85-147
Electroforming. Samuel Wein.....*486
Glass fabric insulation. G. L. Moses..*192
Industrial adhesives. J. L. Perkins.. 135
Iron molds made by electrodeposition. 398
Koroseal *332
Machinability of steels. Sorenson & Gates *12
Magnesium silicate ceramics used for parts of machines and instruments. H. G. Beebe.....*111
Magnet coils-insulating materials. G. L. Moses (Ref. Bk. Sheets)..... 85
Material purchased should be capable of service required (ed)..... 319
Plastics in airplanes.....*290
Rubber molds for casting of metals and plastics. G. D. Kratz.....*388
Testing new materials. D. F. Miner.. *60
Vibration isolation materials.....*137

Mechanisms and Constructions:

Ball bearing size shafts. A. C. Rasmussen (table) 381
Backlash not involved in C value of gears. A. L. Wilde..... 255
Built-up welded constructions. O. W. Fisher *146
Capacitor motors. T. C. Lloyd, pt. 1, *489; pt. 2.....*545
Centrifugal clutches—formulas for calculating torque and power. D. N. Drugis *242
Compression spring adjusting methods. Henry Martin, pt. 1, *114; pt. 2. .....*142
Connection diagrams for multi-speed motors. W. S. Rigby, pt. 1, *223; pt. 2.....*271
Developments and constructions.....*535
Drives for controlling tension.....*172
Electrical contacts. Emmert, Wiggs & Heil, pt. 1, *194; pt. 2.....*249
Electronic devices for detecting variations in dimensions and color. G. C. Devol Jr. *101
Epicyclic crank. F. W. Shaw..... *76
Gear calculations. A. C. Rasmussen, pt. 1, 53; pt. 2..... 109
Grinder has complete electrical control *47
Helical spring tables. Paul Klamp, pt. 1, 361; pt. 2, 407; pt. 3 508; pt. 4 *556; corrections..... 553
Hydraulic circuits for controlling rate of feed in machines. A. H. Dall..*336
Induction motors. Lloyd & Thomas pt. 1, *19; pt. 2.....*68
Internal gears—formulas for calculating wear pressure. W. F. Larsen..*301
Investigation of stresses in pin joints in plates by photoelastic methods. A. G. Solakian.....*548
Motor drives for vertical shafts. H. D. Seymour *396
Multi-speed motors. W. S. Rigby.... 200
New York World's Fair color symphony *330
Network nomogram construction. C. P. Nachod (Ref. Bk. Sheets)..... 41
Planer drive, Westinghouse variable voltage *446
Radio nurse *8
Shrinkage stresses in arc welded structures. H. V. Wenger Jr.....*203
Slotter operated hydraulically..... *6
Spot welded joints. L. H. Frost..... *15
Strength of screw threads under tensile, fatigue and impact loads. R. R. Moore *475
Torsion spring design charts. Victor Tatarinoff *208

Torsion springs. F. M. Cousins.....*287
WR² of various shaped bodies. J. L. Swyers *175
Wiring devices tested for safety and performance. S. Keillen..... *24

Metals:

Coloring of metals. Dr. C. B. F. Young, pt. 1, *57; pt. 2, *197; pt. 3, *295; pt. 4.....*385
Electroforming. Samuel Wein.....*486
Furnace brazed joints. H. H. Schmitt.*341
High-temperature steel design. E. A. Davis *104
Iron molds made by electrodeposition 398
Joining metal and plastics. J. E. Simonds *493
Powdered iron production lags.....*554
Raising the modulus of cast iron. J. T. MacKenzie..... 210
Silver research for third year..... 398
Some developments in metals..... 514
Wrought brasses and bronzes—properties and applications..... 156
Miller, Kearney & Trecker vertical.....*483
Milling machine, Kearney & Trecker.....*448
Milling machine, Sundstrand, has hydraulic feed *414
Mirror, illuminated hand.....*286
Molding, automatic plastic.....*132
Monopolies for the public welfare?..... 498

Motors:

Built-in thermal devices for small motors. F. S. Appleton.....*252
Capacitor motors. T. C. Lloyd, pt. 1, *489; pt. 2.....*545
Connection diagrams for multi speed motors. W. S. Rigby, pt. 1, *223; pt. 2, ...*271
Induction motors. Lloyd & Thomas, pt. 1, *19; pt. 2..... *68
Motor drives for vertical shafts. H. D. Seymour *396
Multi-speed motors. W. S. Rigby.... 200
Selsyn motors on airplane instruments *10

N

Network nomogram construction. C. P. Nachod (Ref. Bk. Sheets)..... 41
New materials and parts. 36, 79, 122, 214, 263, 310, 356, 401, 458..... 502

New York World's Fair:

Lagoon of Nations color symphony..*330
Research for the world of tomorrow. G. F. Nordenholt.....*274
Nomenclature for gears. A. C. Rasmussen, pt. 1, *53; pt. 2.....*103
Nomogram for length of rolled material. C. P. Nachod..... 351
Nomograph for selection of tap drills. N. W. Taylor..... 393
Nut runner *52

P

Pantograph, Gordon *438

Parts and Units:

Aluminum pressings *366
Automatic plastic molding.....*132
Ball bearing troubles. Thomas Barlish *88
Bicycle generator parts.....*282
Blower housing for auto heater..... *95
Built-in thermostatic controls for small motors. F. A. Appleton.....*252
Ceramic parts. H. G. Beebe.....*111
Chrysler imperial fluid coupling..... *96
Cold forged parts. Herbert Chase.... *2
Dental equipment of die-cast aluminum *188
Die-cast and molded plastic parts compared. Herbert Chase.....*320
Differentials on heavy duty truck.... *5
Directory of electrical and mechanical parts, materials and finishes. Apr. 85– 147
Eliminating backlash in lead screws. J. A. Honegger.....*302
Engines, transmissions and chassis changes for 1940 autos.....*465
Fastening methods for die-castings..*496
Flame hardening boring lathe spools.*382
Forging hammer *326
Friction clutches. Herbert Chase..... *72
Furnace-brazed joints *166
Furnace brazed joints. H. H. Schmitt.*341
Heavy-duty bearings. L. M. Tichvinsky *22
Inserts for molded plastics parts. Warner & MacKenzie.....*28
Joining metal and plastics. J. E. Simonds *493
Laminated-phenolic cams. G. J. Talbourdet *369
Liquid-tight riveted joints. F. M. Morris *348
Magnet coils. G. L. Moses (Ref. Bk. Sheets) *317
New methods in plastics for automobiles *62
"Oilless" or self lubricating bearings.*158
Oldsmobile's hydra-matic drive.....*466
Selsyn motors on airplane instruments *10
Studebaker's Champion described....*226
Thermostat housing *282
Valve, tank car *10

Patents:

Case histories in patent law. H. A. Toulmin Jr.....35, 121, 213, 309, 400
Changes inevitable in the system (ed) 1
Changes in patents pending. G. F. Nordenholt *44
Greatest source for new ideas (ed).. 179
Secrets or patents. H. A. Toulmin .. 543
Six patent law changes.....Sept. 4
What is invention. H. A. Toulmin, Jr., pt. 1, 66; pt. 2, 247; pt. 3..... 339
Permanent wave machine made modern. *50
Photoclastic analysis. A. G. Solakian....*548
Photo-electric cells:
Electronic devices for detecting variations in dimensions and color. G. C. Devol Jr. *101
Photography with short exposure is possible with electronic lighting..... 119
Pipes, strength of thin. Victor Tatarinoff 351
Planer drive *534
Planer, Gray *443
Planetarium's lifting device.....*544

Plastics:

Application of plastics in airplane construction *290
Automatic plastic molding.....*132
Cost statement about plastics give wrong impression. V. I. Zelov.... 499
Design of inserts for molded plastics parts. Warner & MacKenzie..... *28
Designing metal-backed plastic parts. C. H. Whitlock.....*167
Die-cast and molded-plastic parts, compared. Herbert Chase.....*320
Joining metal and plastics. J. E. Simonds *493
Koroseal *332
New methods in plastics for automobiles *62
Soap dispenser of plastics.....*187
Some developments in plastics..... *548
Plugs, fusible-melting points..... 78
Press, Hannifin hydraulic.....*449
Printing machine, dry process..... *9
Propeller, full feathering.....*524
Pumping unit, Moineau type.....*378

R

Radio nurse *8
Range, stainless steel top on.....*375
Rayon machine that spins, processes, dries and twists viscose yarn continuously, *98; *180

Reference Book Sheets:

Connection diagrams for multi-speed motors. W. S. Rigby, pt. 1, *223; pt. 2 .....*271
Helical spring tables. Paul Klamp, pt. 1, 361; pt. 2, 407; pt. 3..... 508
Magnet coils. G. L. Moses, *129;....*317
Magnet coils-insulating materials. G. L. Moses 85
Network nomogram construction. C. P. Nachod 41

Research:

New York World's Fair research. G. F. Nordenholt *274
Testing new materials. D. F. Miner *60
Through the windows of research. L. A. Hawkins.....*273
Rolling mill *515

Rubber:

Adhesives. J. L. Perkins..... 135
Air-foamed latex. E. E. Ellis.....*298
For vibration control..... 138
Koroseal, synthetic rubber.....*332
Molds for casting of metals and plastics. G. D. Kratz.....*388

S

Sander, electric *517
Sander, floor *7
Sander with aluminum frame.....*191
Saw, Peerless, has hydraulic automatic control *417
Scales have torque motors.....*375
Screw machine, Cleveland automatic....*452
Screw machine, Greenlee automatic six-spindle *486

Screws:

Eliminating backlash in lead screws. J. A. Honegger.....*302
Screw and nut adjustment with spring centering. Henry Martin, pt. 1, *114; pt. 2.....*142
Strength of screw threads. R. R. Moore *475
Seal, oil, for shaft. Sanford, Bergmann.*304

Shafts:

Ball bearing bore size. A. C. Rasmussen (table) 381
Flexible, and casings.....*150
Motor drives for vertical shafts. H. D. Seymour *396
Shaper, Rockford, ram and table feed hydraulically-actuated *420
Ship, S. S. Panama.....*289
Silver research 119
Slitter, high speed.....*234
Slotter, vertical, operated hydraulically.... *6
Shoe heel finishing machine, Bodine.....*426
Shrink fits with dry ice.....*400
Soap dispenser of plastics.....*187
Spinning machine for rayon yarn, that spins, processes, dries and twists continuously *98; *180
Spray gun *378

Springs:

Compression spring adjusting methods. Henry Martin pt. 1, *114; pt. 2....*142
Helical spring tables. Paul Klamp, pt. 1, 361; pt. 2, 407; pt. 3, 508; pt. 4, 556; corrections..... 553
Torsion spring design charts. Victor Tatarinoff *208
Torsion spring design. Victor Tatarinoff *255
Torsion springs. F. M. Cousins.....*287
Vibration isolation by springs.....*138

Standardization:

Precision circles made by standards Bureau 554
Wiring devices tested for safety and performance. S. Keillen..... *24
Stapler *11

Steel:

How to interpret and apply creep data in designing member for high temperature service. E. A. Davis.....*104
Machinability of steels. Sorenson & Gates *12
Machinability of steels. Williams, Sorenson, West *117
Notch impact tests. J. W. Sands.... 77
Spot-welded structures. G. G. Cudhea, pt. 1, *344; pt. 2.....*390
Weight and WR². G. P. Dorsey..... 305
Stored energy in airplanes. V. H. Grant 379

Stresses:

Effect of rotation on shrink-fit stress. M. F. Spotts.....*116
Investigation of stresses in pin joints in plates by photoelastic methods. A. G. Solakian *548
Notch impact tests. J. W. Sands.... 77
Pipe fitting stresses. A. J. Dickson..*498
Shrinkage stresses in arc welded structures. H. V. Wenger Jr.....*203
Superfinish-method of machine surfaces. A. M. Swigert.....*244

T

Tank trailer *8
Tanks, liquid-tight riveted joints for. F. M. Morris *348
Testing machine for airplanes.....*190
Testing machine, precision.....*375
Thermostat housing *282

Tractors:

Light-weight *355
Minneapolis-Moline tractor *232
With off-set engine.....*376

Trains:

Streamlined 33
Subway train, streamlined.....*280
"Trail Blazer" *398
Transformers overload can be determined by copper temperature..... 211

Transmissions:

Buick's 1940 transmission changes....*470
Chevrolet's 1940 transmission changes*471
Chrysler combines fluid coupling with convention *96
Oldsmobile's hydra-matic *466
Transmissions and engines for 1940 autos *465
Trucks, industrial lift..... *11

V

Valve, tank car..... *10
Vernier mechanism. Herbert Chase..... 557
Vibration isolation *137
Voltages stepped up or down or converted from a.c. to d.c. and vice versa. D. G. Fink.....*168

W

War:

Big jobs to be done (ed)..... 411
Business stands against. J. H. McGraw Jr. .....Oct.
Wear and abrasion resistant surfaces.... 162
Weight and WR². G. P. Dorsey..... 305

Welding:

Build up welded construction. O. W. Fisher *146
Flame descaling castings.....*399
Galvanized sheets and plates arc-welded *509
Shrinkage stresses are arc welded structures. H. V. Wenger, Jr.....*203
Spot-welded joints. L. H. Frost.....*15
Spot-welded structures. G. G. Cudhea, pt. 1.....*344
Wiring devices tested for safety and performance. S. Keilien.....*24
